Contract winding and packaging of non-woven fabrics and technical textiles

At the beginning of 2016, our company continued to develop, expanding from wholesale trading to contract winding and packaging. Due to high demand, we expanded our machine park at the end of 2019 with another winding and packaging machine.

With our modern winders, we wind and package non-woven and woven fabrics up to a maximum roll width of 320 cm and a maximum roll diameter of 130 cm.

We provide impressive solutions through:

- Smooth winding by state-of-the-art machines
- Winding of short rolls starting at 5 m
- Sleeves available in various materials and thicknesses
- Maximum flexibility
- Fast processing and delivery capacity
- Fully automatic packaging and palletising
- Customised design and packaging
- Many years of experience in contract winding and packaging

Materials we already wind and package as contract manufacturer:

Impact sound insulation, cover fleece, protection fleece, painter's fleece, roof & façade fleece as well as film products.
